Permissions for EPA.pdf

Hello Everyone:

I have gone through the access consent forms that Kathy sent to me. Using her spreadsheet, the forms and County Recorder Ownership plat maps I was able to put this exhibit together.

Kathy you and your team have done a lot of this already - Thanks.

This is a preliminary exhibit in that it may not be 100% accurate.

On the map, there is a bold red line. This is a line that, based on the topography, may be the extent of tailings. It is not based on any field examination so it is not usable for any purpose other than exhibits.

The parcels that are green are parcels where access has been granted either specifically or generally by the owner. When I say that you need to look at the consent given by the Pace family. That consent lists some parcels at the top but says in the text something like any "lands in lower silver creek". Any parcel in any color other than green needs to have access obtained. There is one Park City parcel north of the Promontory road and east of the Rail Trail. There is a Pivotal/Promontory parcel on the location of the Big Four Mill. There are

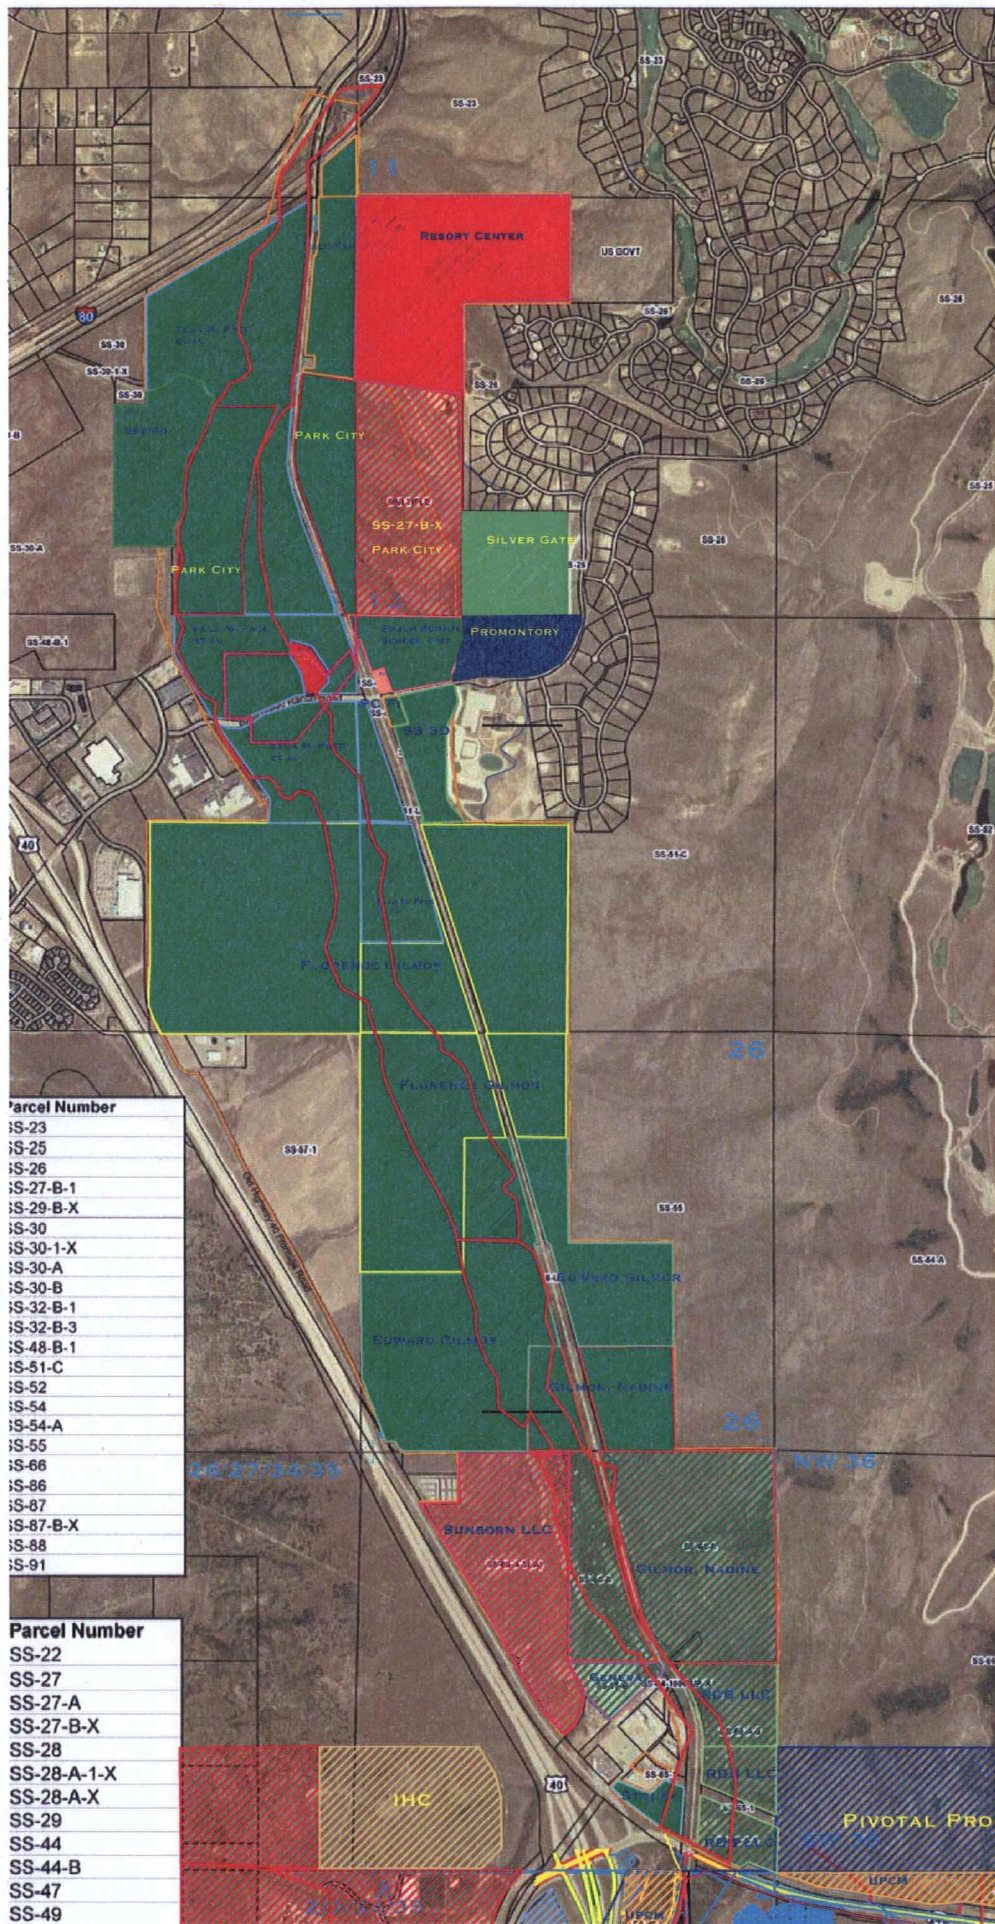

other parcels east of the trail that need a consent. I think that Kathy and I need to discuss these because I am not sure they were even irrigated and may not be contaminated.

There is also the parcel that Park City and Summit County jointly purchased last year that needs a consent form. There is also an issue with the triangular parcel near the south end that has been developed that has a corner inside the red line. This development was before or at least at the same time as the development of the ordinance.

So anyway, please take a look at this exhibit and let me know if you have any issues.

Thanks

Kerry
